SILVER YACHTS' 85M LOFT ON COURSE FOR 2018

WEST AUSTRALIA BUILDER Silver Yachts has announced that the 85m *Silver Loft*, a 'fast world explorer vessel in genuine full-fledged superyacht finish', is expected to be delivered in the third quarter of 2018.

The aluminium hull and superstructure are already completed, while the expansive teak decking on the exterior and the interior fit-out of the main and upper decks are underway.

Designed by Silver Yachts owner Guido Krass and renowned naval architect Espen Oeino, *Silver Loft* builds on the technical supremacy of her predecessors with the yard's most efficient low-draft hull to date. The megayacht is expected to reach 24 knots and have a range of 5,000nm at 18 knots.

Germany-based Andreas Holnburger of Vain Interiors has created a luxurious interior with teak and oak panelling, metallic painted features, and oak and marble floors.

The 300sqm upper deck 'Loft' has 3.75m-high, floor-to-ceiling windows and an open-plan arrangement, and leads to the large wintergarden with wraparound sliding glass panels and air conditioning, allowing entertainment and dining indoor and outdoor.

Silver Loft offers eight guest cabins comprising the owner's suite, three VIP cabins and four more cabins for up to 18 passengers.

ARCADIA MARCHES FOR.TH WITH STEEL HULLS

DYNAMIC ITALIAN SHIPYARD Arcadia Yachts has confirmed its entry into steel-hulled vessels with its new Gamma FOR.TH range. Only founded in 2010, Arcadia is collaborating with Hot Lab Studio

on Gamma FOR.TH, which stands for Forward Thinking.

The first model in the FOR.TH collection will measure 47m in length, have a beam of 9m and a displacement of just under 500GT.

The use of large glass surfaces and open transoms on both the main and upper decks will provide a connection to the environment, with an almost completely glass prism providing the interiors with a great amount of natural light.

Usable space is concentrated a bit forward of midships to allow for ample sunlit and shaded areas on the aft decks, while the itself sundeck covers 78sqm.

The owner's suite and private terrace are forward on the main deck, while lower-deck guest accommodation comprises two 29sqm VIP cabins with private bathrooms and studios, plus two 16sqm twin cabins with en-suites.

Arcadia also produces its original Gamma A range, which features 85, 85S, 100, 100+ and 115 models, and a new Gamma Sherpa range, with a 72ft model expected by early 2019.

SUPERYACHT
52STEEL

YOUR HIGHEST EXPECTATIONS. FULFILLED BY OUR HIGHEST STANDARDS.

Discover the 52 Steel. Perfect balance between volume and elegance.

This is Sanlorenzo's unique approach in the world of superyachts. The 52Steel's sleek and pure lines embrace a more than generous space: the transparent swimming pool, the floodable 8-meter tender garage convertible into a huge luxury beach area at sea level, the six spacious cabins, everything has been designed with the highest standards of beauty and refinement, which marks Sanlorenzo's know-how. With more than 30 superyachts already built and delivered, we will certainly be able to fulfil your expectations together. As high as they may be.
