

Arcadia Yachts is reinventing itself and has co-opted Hot Lab of Milan to assist. The first fruit of Arcadia 2.0 is the A100+, an evolution of the 30-metre which debuted at Cannes Yachting Festival. Clean, multifaceted masculine lines, floor-to-ceiling windows, generous decks, solar panels and all-round green ethic speak of Arcadia's heritage. Guests now have even more living space, however, in the form of a larger upper deck and an optimized foredeck. Movement is easier too thanks to cleverly positioned stairwells. The aft deck seats 10 for formal dining, while the lounge area seats 12, so it's perfectly feasible to have 20 people for dinner. The upper deck is a pleasantly private mix of interior and exterior spaces and fine views. Five interior layouts cater to a broad range of needs yet simplify design choices and cut development time. The pared-back contemporary look mirrors the exterior styling as well as enhancing the inside-outside feel. Lush detailing and finishes include exotics such as Carbalho wood and resin paneling. Soft leathers and cottons meld with warm natural oak and ebony. Muted greys, sands, creams, blacks and whites create a restful, welcoming and, of course, luxurious ambience. www.arcadiayachts.it
