Bilgin 50m
CAMILA

Ataşehir Bilgin Modeli - 1. Nisan 2014 - 2015

Bligh Yachts unveiled the luxurious interiors of its latest masterpiece, MY Camilla, which was delivered to a US owner in June. Showcasing her 50-meter stature at a late January launch from Bligh's starboard yard, Camilla displayed her carefully adorned curves from Unique Yacht Design's. Recently, her palette of interior hues, inspired by nature, highlighted the fresh, elegant, and balanced blend of Hot Lab throughout the yacht, effortlessly blending interior and exterior spaces.

Bligh takes great pride in a very high rate of satisfaction among clients, with many returning when considering their next purchase. Bligh CEO, Irmal Sengul, notes, "Today, the Bligh 103 is our most ambitious project and is a perfect example of what we can propose to the adventures of the sea." Camilla, the second yacht of the 50-meter 103 hulls after Eternal Spark, offers an exciting visual exploration of such adventures.

Camilla By The Numbers

As the naval architect for the project, exterior design and system design for Camilla were created by Unique Yacht Design in Antalya, Turkey. Interior design is from the UK studio of Hot Lab. Both firms also performed similar work for Bligh's Eternal Spark, the first yacht of the 103 series.

Camilla stretches 48.90 meters in length, with a 40.20-meter waterline. Her beam is 9.20 meters and her draft is 2.00 meters. Fully loaded, displacement weights in at 680 tons, with 690 GT.

She is powered by two CAT C32 1081 kW Marine Diesel Engines and three BB MW CAT C4.4 107 KVA Marine Diesel generators, giving her a range of 5,000 nautical miles at 10 knots and a top speed of 17 knots. She is fitted with a 110 kW electrical bowthruster and a four-in electrical machine. The galleys is outfitted with high-end Miele equipment. The entertainment system follows suit with a highly regarded Savant/Luton system.

The cabins, located on four decks, include one master cabin, one VIP cabin, two double-bed guest cabins, two twin-bed guest cabins, one captain's cabin, and four crew cabins. She also has two saloons and a beach club. In all, Camilla carries 12 guests in six cabins, served by 9+1 crew.

The Main Deck Saloon and Dining Area

A chic combination of Italian style and masterful craftsmanship, the main saloon offers extraordinary views through large windows, slices of mirrored wall surfaces, mosaics woven with wood, and stone flooring. A subtle palette of natural soft tones in soothing neutral shades is accented by a jet-set-inspired collection of loose pillows. Reflections of the room dance about the glass and narrow strips of mirror, glazing artfully courtesy of the dining room chandelier. The feeling is super spacious, and the massive views add magic and mystery to the mood.

Forward of the saloon, the dining space continues the theme, with a dozen dining chairs, placed around a slightly rectangular table. The chairs, upholstered in a soft sand, are a lovely contrast to the silky fit and beautifully sculpted glass sconces hanging from the chandelier.

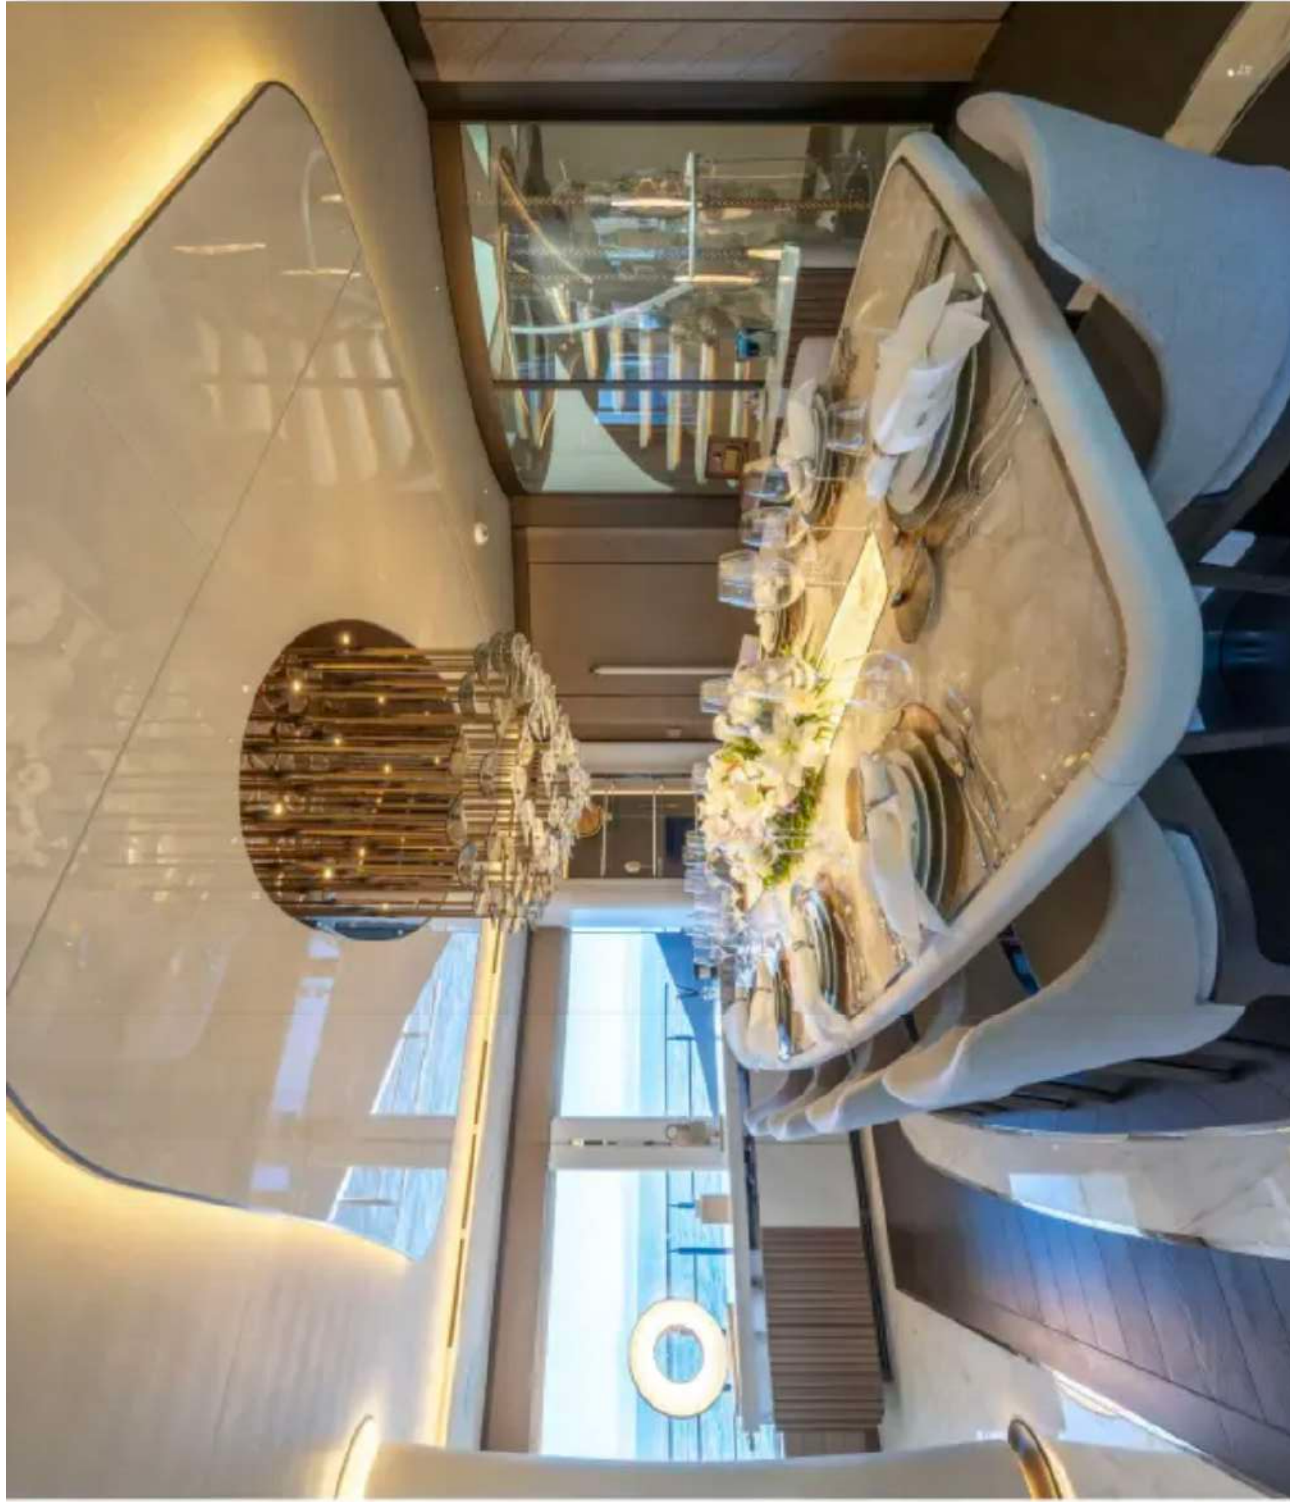

Forward of the dining space, the wooden mosaics add visual texture to the doors, while a curved glass wall surrounding the curved free-floating stair issues a contemporary note. Forward of the stairwell, a pantry and galley sit to port with lobby access to the owner's cabin and a day head to starboard. A thoughtful crew lobby, dry storage, and crew stair are tucked into the corner.

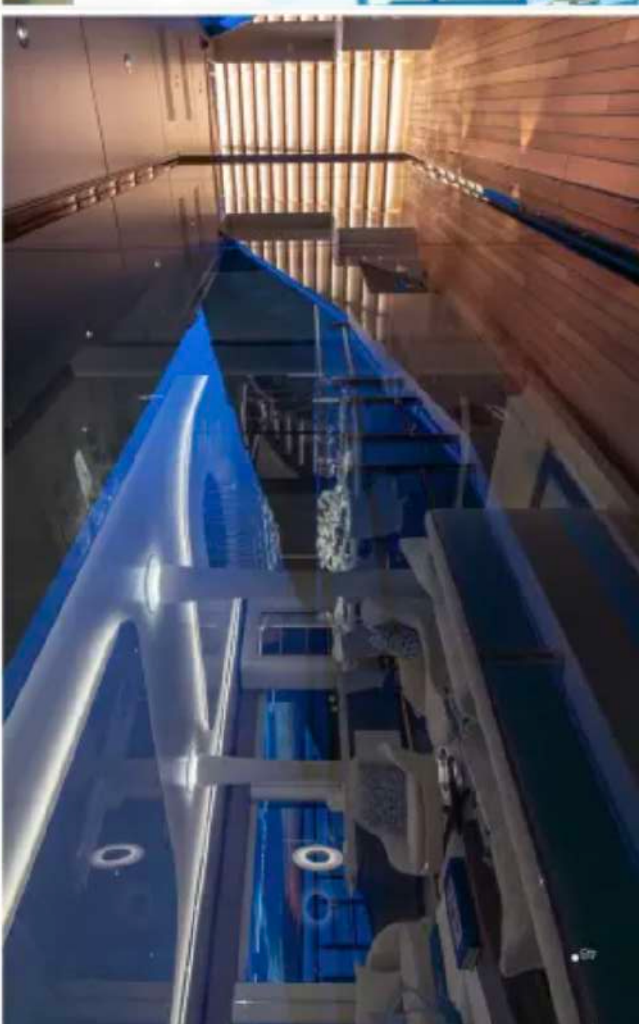

The Main Deck Owner's Cabin

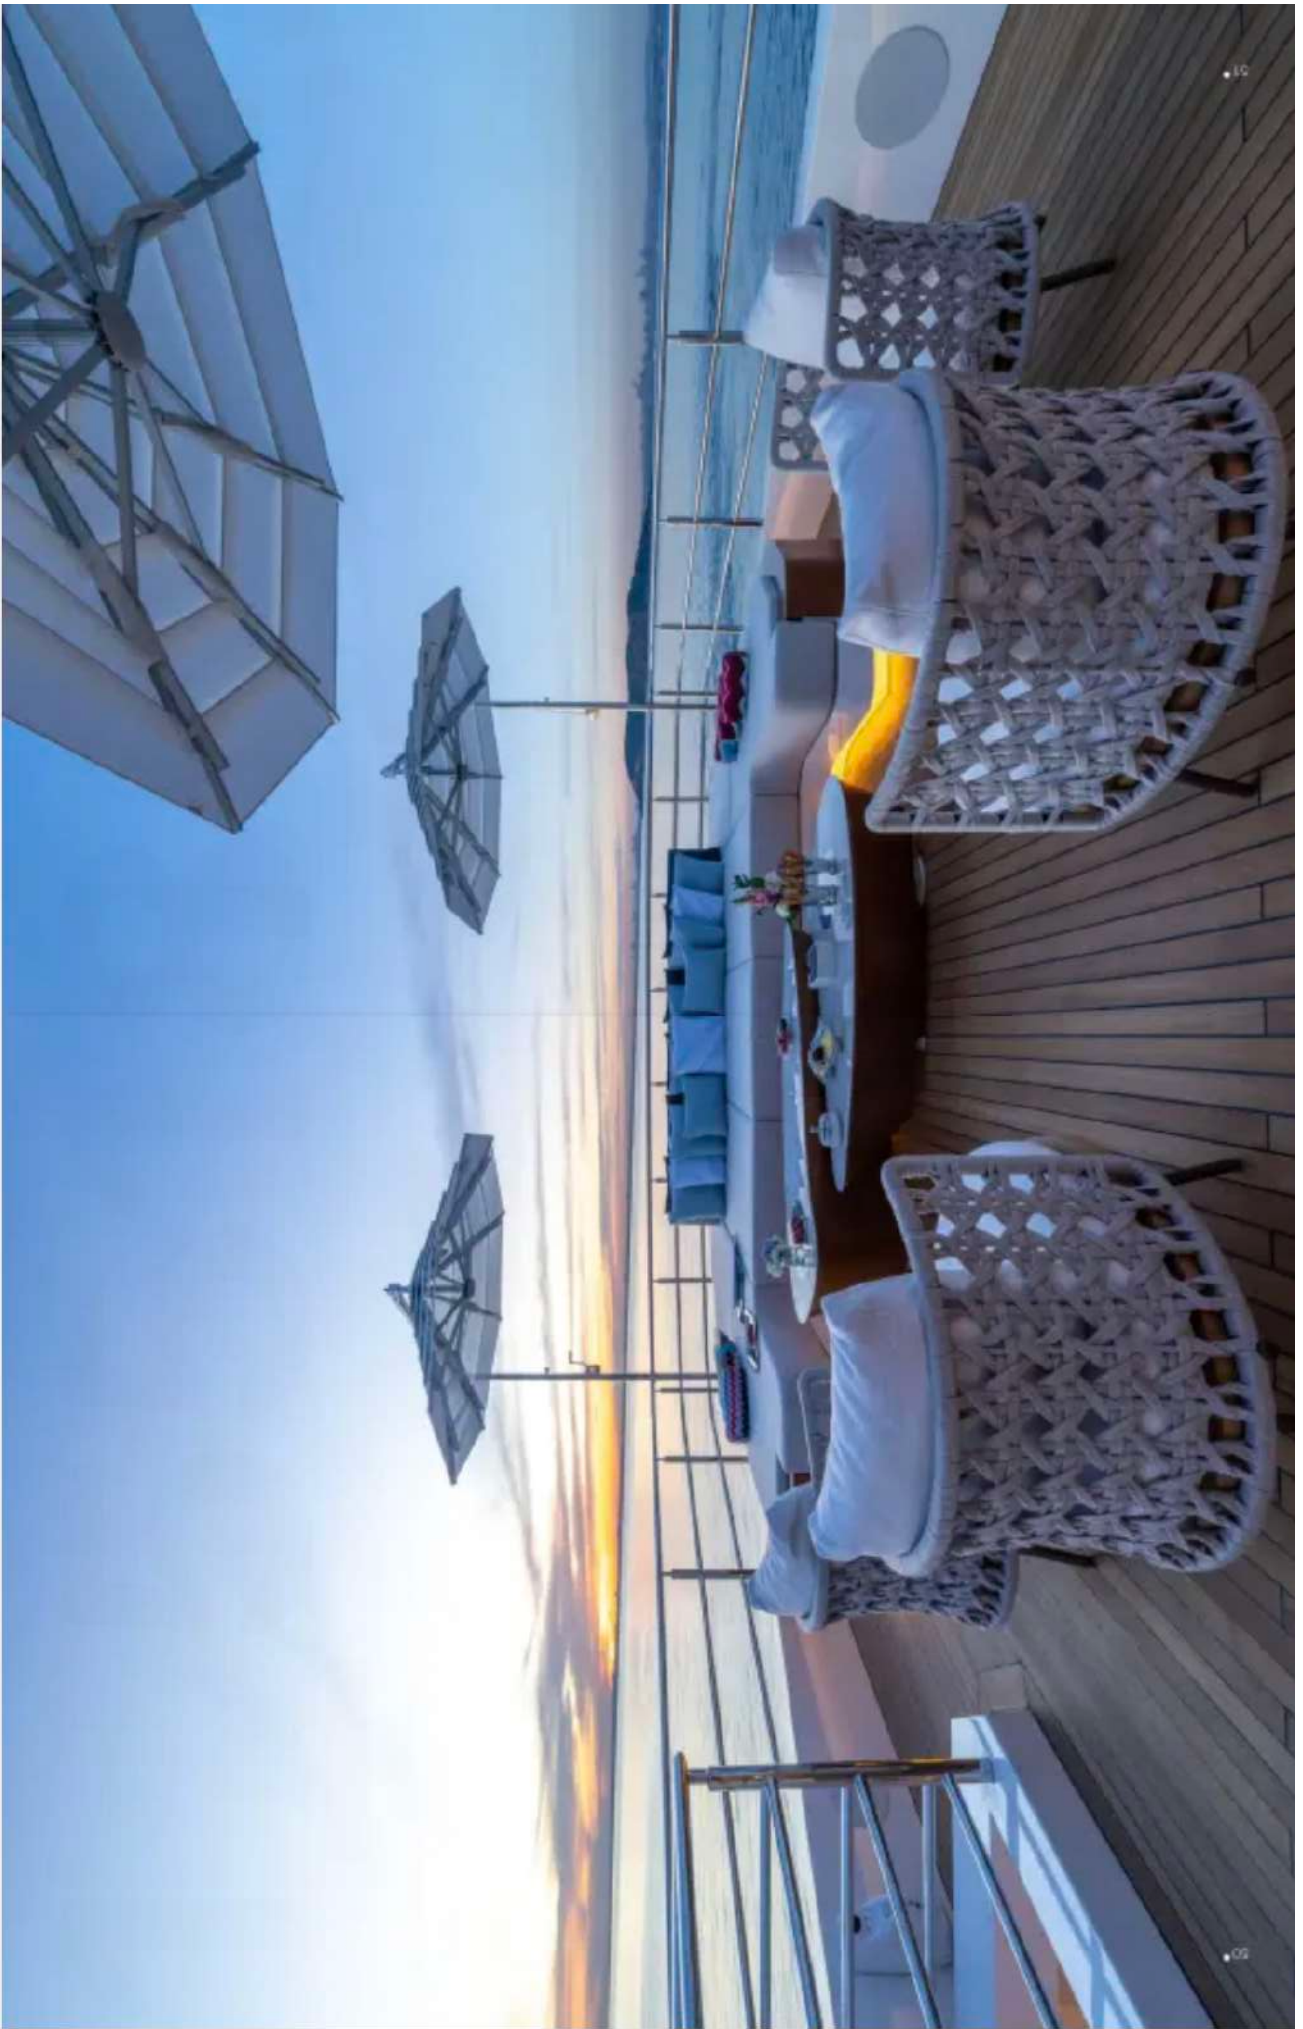

Entry to the fully forward main deck Owner's Cabin routes through the private office, with a stone-clad desk, soft sand sofa, and a pair of built-in bookshelves. Richly textured and embellished with textured woods, metal-mesh laminated glass, touches of gleaming chrome stainless steel, and deeply plush Italian carpets provide a most relaxing enclave with a slightly understated elegance that whispers, rather than shouts, **"this is your perfect peace."**

The Owner's cabin includes an excellent array of hanging space, dressing, and storage in the spacious walk-in closet. The bath is finished in subtle marbles and matching woods, with important yet low-key lighting where it matters most. Chrome hardware brightens the look further, with a large glass shower, and separate toilet and bidet.

Generous head heights grace all living areas. Low bulkheads and large windows all contribute to the intoxicating views Camilla offers her guests.

The Lower Deck VIP Cabin

Matching the Owner's cabin in nearly every aspect, the lower deck VIP cabin is created with curves and natural materials, inspiring a sense of calm luxury. Located amidships, the VIP is full beam. Laminated glass and metal mesh make the space seem even larger than it is, while dark mirrors add an element of infinity, translating to exceptional volumes of space.

The bath, similarly executed in marble, glass, fine woods, and subtle bronze beam, is one of the most relaxing and sophisticated. A seating area with contemporary mid-century modern upholstered chairs set in front of bookshelves and a series of windows adds to the feeling of spaciousness.

Additional Lower Deck Cabins

Just forward of the VIP cabin, two double staterooms match port and starboard, with similar decor and an excellent capacity to calm and soothe with soft textures in harmonious natural palettes. Bathrooms are located aft, against the forward wall of the VIP cabin. Entry is through the hall running forward and aft from the central staircase.

Forward of the double cabins and the stair, there are two double cabins with en suite baths set against the forward walls of the double cabins. All cabins have lovely windows offering an abundance of natural light.

The Beach Club

The spacious beach club truly shines, with a sauna, day head and showers, and ice fountain. There is a mobile lounge, glassy white bar and comfy lounge located forward and a few steps down from the beach platform, providing an inviting entertainment space that feels intimately engaged with the sea.

The Bridge Deck and Upper Deck

Fully forward on the upper deck, the wheelhouse offers seating just in front of the captain's command station, giving guests a fantastic forward view. Aft of the wheelhouse, the captain's office and an aft cabin sit to starboard, and the pantry and drinks bar buffer aft to port, both surrounding the beautiful glassed-in central stair.

The bridge deck saloon is a comfy spot for smaller gatherings, with

an angled sofa to port and a dining table for eight to starboard. A day head sits to starboard just forward of the dining area.

Aft of the saloon, the extensive 12-meter aft deck provides a tresco dining for twelve. A seated bar to port and a large, inviting sofa set opposite a pair of casual round lounge chairs. A U-shaped sofa sits fully aft, overlooking the beach club. Lots of seating and a lovely outdoor dining and entertaining space, there are stairs both to the main deck and the sun deck sitting to starboard.

The Sun Deck

Extending 21 meters, the sun deck is possibly the most exciting space on the yacht, providing spaces for those interested in a jacuzzi dip and quick sun pad stretch fully forward, or a relaxing lounge on the round sun beds or the lounge chairs aft. In between, a dining space benefiting from the cover of the Bimini top is the perfect spot for a leisurely lunch, afternoon cocktails, or even an early supper and coo-sant. There is plenty of deck space, so a sunrise yoga session also works in perfectly.

Summing Up Camilla

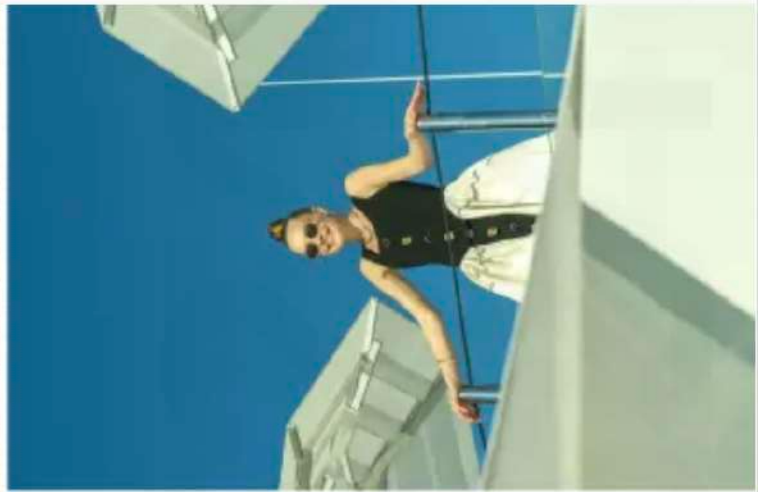

Truly remarkable use of space, with brilliant inserts of reflective surfaces and large windows, Camilla is designed to give guests the feeling of ultimate luxury and calm. No one can say it better than those who worked so well as a team to create the masterpiece.

Enrico Lumet, Partner and Head of Design at Hot Lab acknowledged, "With Camilla, we wanted to strike a delicate balance between warmth and sophistication. This is the second 30-meter yacht we have developed for Bligh," continuing, "Every element on board has been carefully crafted to offer both sophistication and comfort." In summary, Lumet adds that Camilla is "A perfect mixture of design, craftsmanship and attention to every detail."

Bessey Vimez, Commercial Director of Bligh Yachts, adds, "We take immense pride in seeing this project come to fruition. Our team has worked tirelessly, and the result is a truly stunning yacht." Vimez adds, "The distinctive elegance of Camilla will undoubtedly capture attention wherever she goes. She is another stunning yacht that will cruise to US waters, and I am grateful to work with an experienced yacht owner who was heavily involved with her design process with Hot Lab."

About Bilgin Yachts

A boutique shipyard on the European side of Istanbul, Bilgin is a family business that has continued for five generations across the 1900s to today, building bespoke 50 to 120-meter luxury superyachts. Under their umbrella, 900 skilled craftsmen perform 90 percent of the work in-house in four facilities spanning nearly 80,000 square meters.

The Yalova facility is capable of accommodating five projects between 50 and 120 meters. In Istanbul, the outfitting facility can handle five projects between 50 and 90 meters simultaneously. Additional manufacturing areas, a marine furniture factory, a comprehensive mechanical, hydraulic, stainless-steel and upholstery workshop all coordinate to bring the next masterpiece from blank design sheet to launch and delivery.

Located just 40 minutes from the Istanbul Airport, the Bilgin Yachts team is at the service of those who wish to embark on the journey of building a "dream yacht to suit a lifetime," as CEO Serkan puts it. ☛

Specifications

- LOA: 40.25m
- LPA, at full load: 48.25m
- Beam overall: 9.22m
- Draught at full load: 2.50m
- Displacement at full load: 495t (full load)
- Minimum speed: 16.5
- Cruising speed: 12
- Range at cruising speed at full load: approx. 5,000 miles
