REFINED INTERIORS

Columbus Yachts has revealed the new 47-metre Atlantique model, M/Y Acqua Chiara, a full-displacement superyacht built for immersive cruising and refined onboard living.

Designed by Hot Lab, her fluid exterior lines, sculptural stern, and 499GT volume reflect a balance of engineering and elegance.

Crafted with a steel hull and aluminium superstructure, she offers expansive outdoor areas across three aft levels, including a scenic pool with fold-out balconies and a sea-level platform just 50cm above the

water. Interiors feature natural oak, Vetrinite panels, Sicis mosaics and custom furnishings, creating a modern yet warm atmosphere. The owner's suite includes a Galaxy-blue palette, leather details, and a marble bathroom with hammam. Guest accommodation comprises four en-suite cabins below deck.

With a 5-metre tender, multiple jet skis, and two garages, Acqua Chiara is both equipped and elegant. Twin 1350hp engines deliver 15.5 knots max speed and a 3,400-nautical mile range at 12 knots, perfect for extended voyages in complete comfort.
